DOMINO / PLANNED COMPLETE DEMO
Blue = retained I Amber dashed = unfinished work

Frontend

Next.js + React
Live map + conversation
Saved simulations + impact chart

Question + explicit scenario request

Backend

Versioned company evidence
Curated 2U source first
Separate pre-cutoff and reveal data

Frozen facts + source dates

Convex durable execution
Validated capability choices
Retries + records + cutoff boundary

Allowed task + cutoff packet

CREAO boundary
Verify identities + isolation
Validate plans and specialist output

Bounded plan request

Actual app jobs

Capability choices

Cited results

Computed branches + causal basis

Validated scenario input

Persist immutable scenario records

Domino financial engine
Baseline / Event / Response
Costs + timing + uncertainty

Reactive results + real job events

External APIs

CREAO coordinator
Select allowed capabilities
Bounded decisions and follow-up

CREAO specialists
Evidence analysis
Costed-response review

Database

Same Convex database
Immutable scenario branches
Evidence, profiles, jobs and results
